

# We have you covered

Modern cars offer huge benefits over cars we all owned a few years ago. They are safer, more reliable, use less fuel and are much easier to drive. They also have a whole host of features for comfort and convenience.

All these improvements means cars are a lot more complicated and, when they occasionally go wrong, it can be an expensive repair.

## We offer WMS Warranties

Voted the best car warranty in the UK, they offer excellent cover with Wear and Tear, Batteries, even Navigation systems are included for a very competitive price and their claims process is second to none.

You always insure your house, so it makes sense to cover your car.

## Here are a few recent examples which may help you decide.

**1** A 4 ½ year old Peugeot 3008 Diesel with 31700 miles developed a fault with the alternator. Repair cost £997. This would have been covered by WMS Safe and Sound Ultimate Warranty purchase price £325.

**2** An 8 year old Range Rover Evoque with 62341 miles had a problem with the rear differential. Repair cost £2560. This would also be covered by WMS Safe and Sound.
